Samyak Goel

SENIOR SECURITY ENGINEER

Delhi, India | samyakgoel5@gmail.com | +91 9557657134 | LinkedIn | Medium | Portfolio

Profile

Senior Security Engineer with hands-on experience across network security, firewall engineering, endpoint security, detection engineering and incident response. Skilled in translating technical data into actionable business context and solving complex security challenges across enterprise environments.

Skills

Detection Engineering & IR Skills
Threat Detection, Alert Triage, Behavioral Detection, Endpoint Telemetry Analysis, Incident Response, RCA, Policy Tuning, Security Monitoring, TAC Coordination

Core Security Tools
FortiGate, Trend Micro Vision One, Palo Alto Cortex XDR, Splunk, MITRE ATT&CK, Sysmon, KAPE, Volatility, Autopsy

Scripting & Querying
PowerShell, Python, Bash, Windows Batch, XQL

Security Concepts
Network Security, Firewall Security, Vulnerability Assessment & Penetration Testing (VAPT), OSINT, Malware Analysis, EDR/XDR, Windows Internals, Security Hardening, Threat Analysis

Professional Experience

Senior Security Engineer 07/2026 – Present
F1 Infotech Pvt. Ltd

Client-Side Responsibilities (Data Center Implementation) | Client: Narcotics Control Bureau (NCB), Government of India

- Part of the team responsible for the **NCB data center and lab build**, overseeing the work from installation through to completion.
- Verify **server configuration, racking and stacking, and workstation setup** against the agreed design before sign-off.
- Track installation progress and flag deviations for correction, so the data center and lab are delivered ready for operation.

Client-Side Responsibilities (Trend Micro Vision One EDR Deployment) | Client: Beltron

- Delivered the **Trend Micro Vision One EDR deployment** across client endpoints, covering implementation, configuration and rollout.
- Handled endpoint onboarding, agent deployment, health validation and troubleshooting through the deployment lifecycle.
- Supported **EDR policy configuration and endpoint security monitoring**; investigated endpoint security and connectivity issues with the relevant technical teams.

Network Security – FortiGate Firewall

- Perform **FortiGate firewall troubleshooting** involving connectivity, policies, traffic flow and network security issues.
- Analyze and manage **firewall policies and configurations**, including configuration changes and daily firewall operations.
- Perform and support **FortiGate firmware upgrades**, including pre-upgrade checks and post-upgrade validation.

Security Engineer 12/2024 – 06/2026 | Mumbai

Swan Solutions & Services Pvt. Ltd.

Client-Side Responsibilities (Primary Project – Cortex XDR Implementation) | Client: Multi Commodity Exchange of India (MCX)

- Served as the **Cortex XDR Lead** at the client site, overseeing endpoint security operations, detection workflows and incident investigation, plus policy tuning and alert optimization through the XDR rollout.
- Analyzed a real-world **XDR bypass** involving PowerShell abuse, AMSI bypass and COM object injection; contributed to RCA and long-term detection logic enhancement.
- Coordinated directly with **Palo Alto TAC & Engineering** to troubleshoot complex behavioral anomalies, validate product functionality and drive issue resolution.
- Authored **36+ XQL detection queries**, improving detection coverage, automating reporting, validating suspicious activity and enhancing InfoSec decision-making.
- Acted as a trusted escalation point for the client's InfoSec Manager, AVP, SOC team and Service Desk, recognized for clarity, reliability and precision during high-pressure incidents.

Company-Side Responsibilities (Internal SOC & Process Building)

- Developed the company's **SOC Incident Response (IR) process**, including the escalation model, notification procedures and documentation templates.
- Led the internal SOC project setup, covering log monitoring structure, alert routing, response workflows and documentation.
- Drafted incident advisories for technical teams with recommended actions, mitigation steps and timelines.

Projects

FWallSim – FortiGate-Style Firewall Simulator 2026

fwallsim.vercel.app

- Designed and built a **browser-based firewall simulator** with a GUI and CLI modelled on FortiOS 7.4; runs entirely client-side, with no server or account.
- Created **13 guided labs and 6 troubleshooting challenges** (policies & NAT, Virtual IPs, LDAP, IPsec and SSL-VPN, SD-WAN, OSPF and BGP) that validate against simulated traffic.
- Built a **Packet Walk** that explains every firewall decision (routing, RPF, policy, NAT) step by step, alongside a *diagnose debug flow* view.

Certifications

Palo Alto Networks PCDRA (Detection & Remediation Analyst)

Palo Alto Networks Certified XSIAM Analyst

ISC2 Certified in Cybersecurity (CC)

Foundations of Operationalizing MITRE ATT&CK v13

SentinelOne Partner Cloud Professional

Antisyphon Training – SOC Core Skills

Education

Bachelor of Technology (B.Tech.) – Computer Science Engineering (Cybersecurity) 08/2020 – 05/2024

Lovely Professional University, Punjab

Languages

Hindi, English
